

Habbig HS850 Tree Cutter

...part of our Waterway Maintenance range

Habbig tree cutters have been manufactured in Germany for over **20 years**, providing high quality and robust tree cutting attachments for excavators and similar machinery.

Hundreds of Habbig tree cutters have been supplied in the UK and Ireland by exclusive distributor, Aquatic Control Engineering Ltd since 1996, to public environmental sectors, rail and other specialised contractors.

Habbig tree cutters are designed to fulfil one simple purpose; higher felling capacities with increased workplace health and safety. All Habbig tree cutters allow the operator to cut and grab timber from within the cab of an excavator and safely, quickly and neatly clear large volumes of branches and trunks. The timber can even be placed exactly where required.

The Habbig HS850 is the **most popular model in the UK**. With a mid-range specification, the HS850 allows for greater cutting capacities without the need for larger specialist excavators. A number of these have been sold to the Environment Agency and drainage authorities.

Design Benefits and Features

Versatility

The HS850 model can be supplied alongside a swivel attachment, allowing rotation of 55 degrees in either direction when mounted on an excavator.

Resting Bracket

This robust model features an additional frame support at the top, allowing tree lengths to rest against it. This is designed not only for additional operator safety, but to comfortably manage greater tree loads.

Technical Specification

Length	1750mm
Width	850mm
Height	1150mm
Weight*	475kg
Opening span	660mm
Max. Working Load	1500kg
Cutting dia. Soft wood	280mm
Cutting dia. Hard wood	210mm
Max. Cut Length	5 m
Hydraulic RAM: cutters	80l/m-100l/m 300 bar
Recommended Excavator size is 11-18 ton	

*please note a swivel attachment is separate and will increase total weight
