

Assembly Fitter Job Description

Full time 40 hours per week, Monday – Friday 0830 – 5pm, permanent role

Based at ACE HQ, Rampton

Aquatic Control Engineering (ACE) Ltd are recruiting for an Assembly Fitter to join the busy Operations and Manufacturing team.

Aquatic Control Engineering are a leader within their sector, supplying turnkey mechanical and electrical solutions for water management, flood defence and environmental services. The Company's focus lies within water control products such as non-return valves, sluice gates, tilting weirs, fish friendly land drainage pumps and fish migration solutions. With both Quality and Environmental solutions, ACE has gained an exceptional reputation over its 25 years within the industry.

This role will be based in the assembly hall, building a wide range of water flow control products. ACE specialise in bespoke products and as such, the projects are extremely varied.

Main Responsibilities

- Mechanical assembly as per drawings
- Use of lifting equipment/measuring equipment as well as usual workshop power and hand tools.
- Preparing completed products for dispatch
- Checking parts for fit and finish
- Maintaining a tidy and safe work environment

Key Skills

The candidate will be mechanically minded with a practical and logical approach to building from parts to a completed product.

- Understanding and interest in mechanical works
- Understanding of working to health and safety requirements
- Experience of working within a team
- Ability to multi-task
- Full UK driving licence.

Experience

It is desirable the candidate will have experience working within manufacturing, fabricating or a workshop environment and have general knowledge of the Health and Safety requirements in such locations.

Qualifications No specific qualifications are required

The role will join an experienced team and training of product specifics and assembly approach will be provided.
